

Water Pump Application Questionnaire

For well-water and other types of water pumps, please use this questionnaire to determine if SureStart can be installed in your pump application.

Pump Types:

- A. Poop Pumps
- B. Spa (Jacuzzi Pumps)
- C. Irrigation Pumps
- D. Submersible Pumps

SureStart can be installed where response is 'Yes' to all following pre-checks.

Common checks for all Applications [A, B, C, D]		Yes	No
1.	Is it a "water" pump only application?		
2.	Can a Surestart be installed in a location shielded from water splash and drip? [Our dimensions: 5.30" x 2.94" x 1.96" (132mm x 72mm x 49mm)]		
3.	Is it a three wire, single phase pump?		
4.	Is it a single voltage pump?		
5.	Is it a centrifugal pump?		
6.	Does it have access to pump motor connection box [It houses the Run, Start, Common terminals and possibly the Run capacitor]		
7.	If a hard start kit is pre-installed, is the Start capacitor rated lower than 300uF?		
Additional Checks for [C] and [D]			
8.	Is the operating pressure head (depth) less than 65 ft.?		
9.	Is Starting pressure head under 40% of the maximum operating capacity of the pump?		

Compare the Pump RLA/FLA to SureStart model digits 5-9 to select proper SureStart model.
